

KIMMS

Key Incident Monitoring & Management Systems

KIMMS Workshops 2011

KIMMS QAP aims to monitor the pre- and post-analytical phases of Laboratory quality systems, thus extending measurement of quality to the entire quality system. The focus of these workshops is to discuss and refine the definitions of the pre- and post-analytical categories with a view to standardize the data being submitted by participants. Kindly supported by the Department of Health and Aging through the QUPP funding agreement.
